

Summer and Fall 2016 Tour Series: Waste Reduction, Reuse, and Recycling Facilities in NYS

Visit efc.syr.edu/homepage-5/ to view the tour schedule and to register.

The Syracuse University Environmental Finance Center (SU-EFC), in collaboration with the New York State Association for Reduction, Reuse, and Recycling (NYSAR³), is excited to announce a special series of tours taking place this summer and fall. The tours will highlight New York State sustainable materials management (SMM) operations including **materials recovery facilities, composting facilities, anaerobic digestion systems, reuse centers**, and more!

At each facility, you will get a first-hand look at how discarded materials such as recyclables, construction debris, food scraps, textiles, and more are diverted from the waste stream and given a second life. Follow tour guides to learn about day-to-day facility operations, as well as their unique challenges and successes. Network with fellow attendees and materials management professionals. And, glean insight and inspiration for SMM opportunities to foster in your own community to improve your local environment and economy.

Tours will be organized regionally by NYSAR³ chapter.

Who Should Attend: Materials management professionals, municipal representatives, staff from non-profit and for-profit organizations, educators, and others are encouraged to attend.
